Auto

Driving Sales Success

Presented by the Katlego Teams of 2025

Market Trends

Key Factors Affecting Sales

Economic Conditions

The **current economic climate** significantly influences car sales, as factors like employment rates, inflation, and interest rates affect consumer purchasing power and dealership performance.

Technological Advancements

Innovations in automotive technology are reshaping the industry, with electric vehicles and advanced safety features becoming increasingly desirable, driving customer interest and shifting market dynamics.

Consumer Preferences

Understanding **shifting consumer preferences** is crucial, as buyers increasingly prioritize sustainability, convenience, and connectivity, which are shaping their decisions and influencing manufacturers' strategies.

Sales Performance Insights for 2025

Conversion Rates

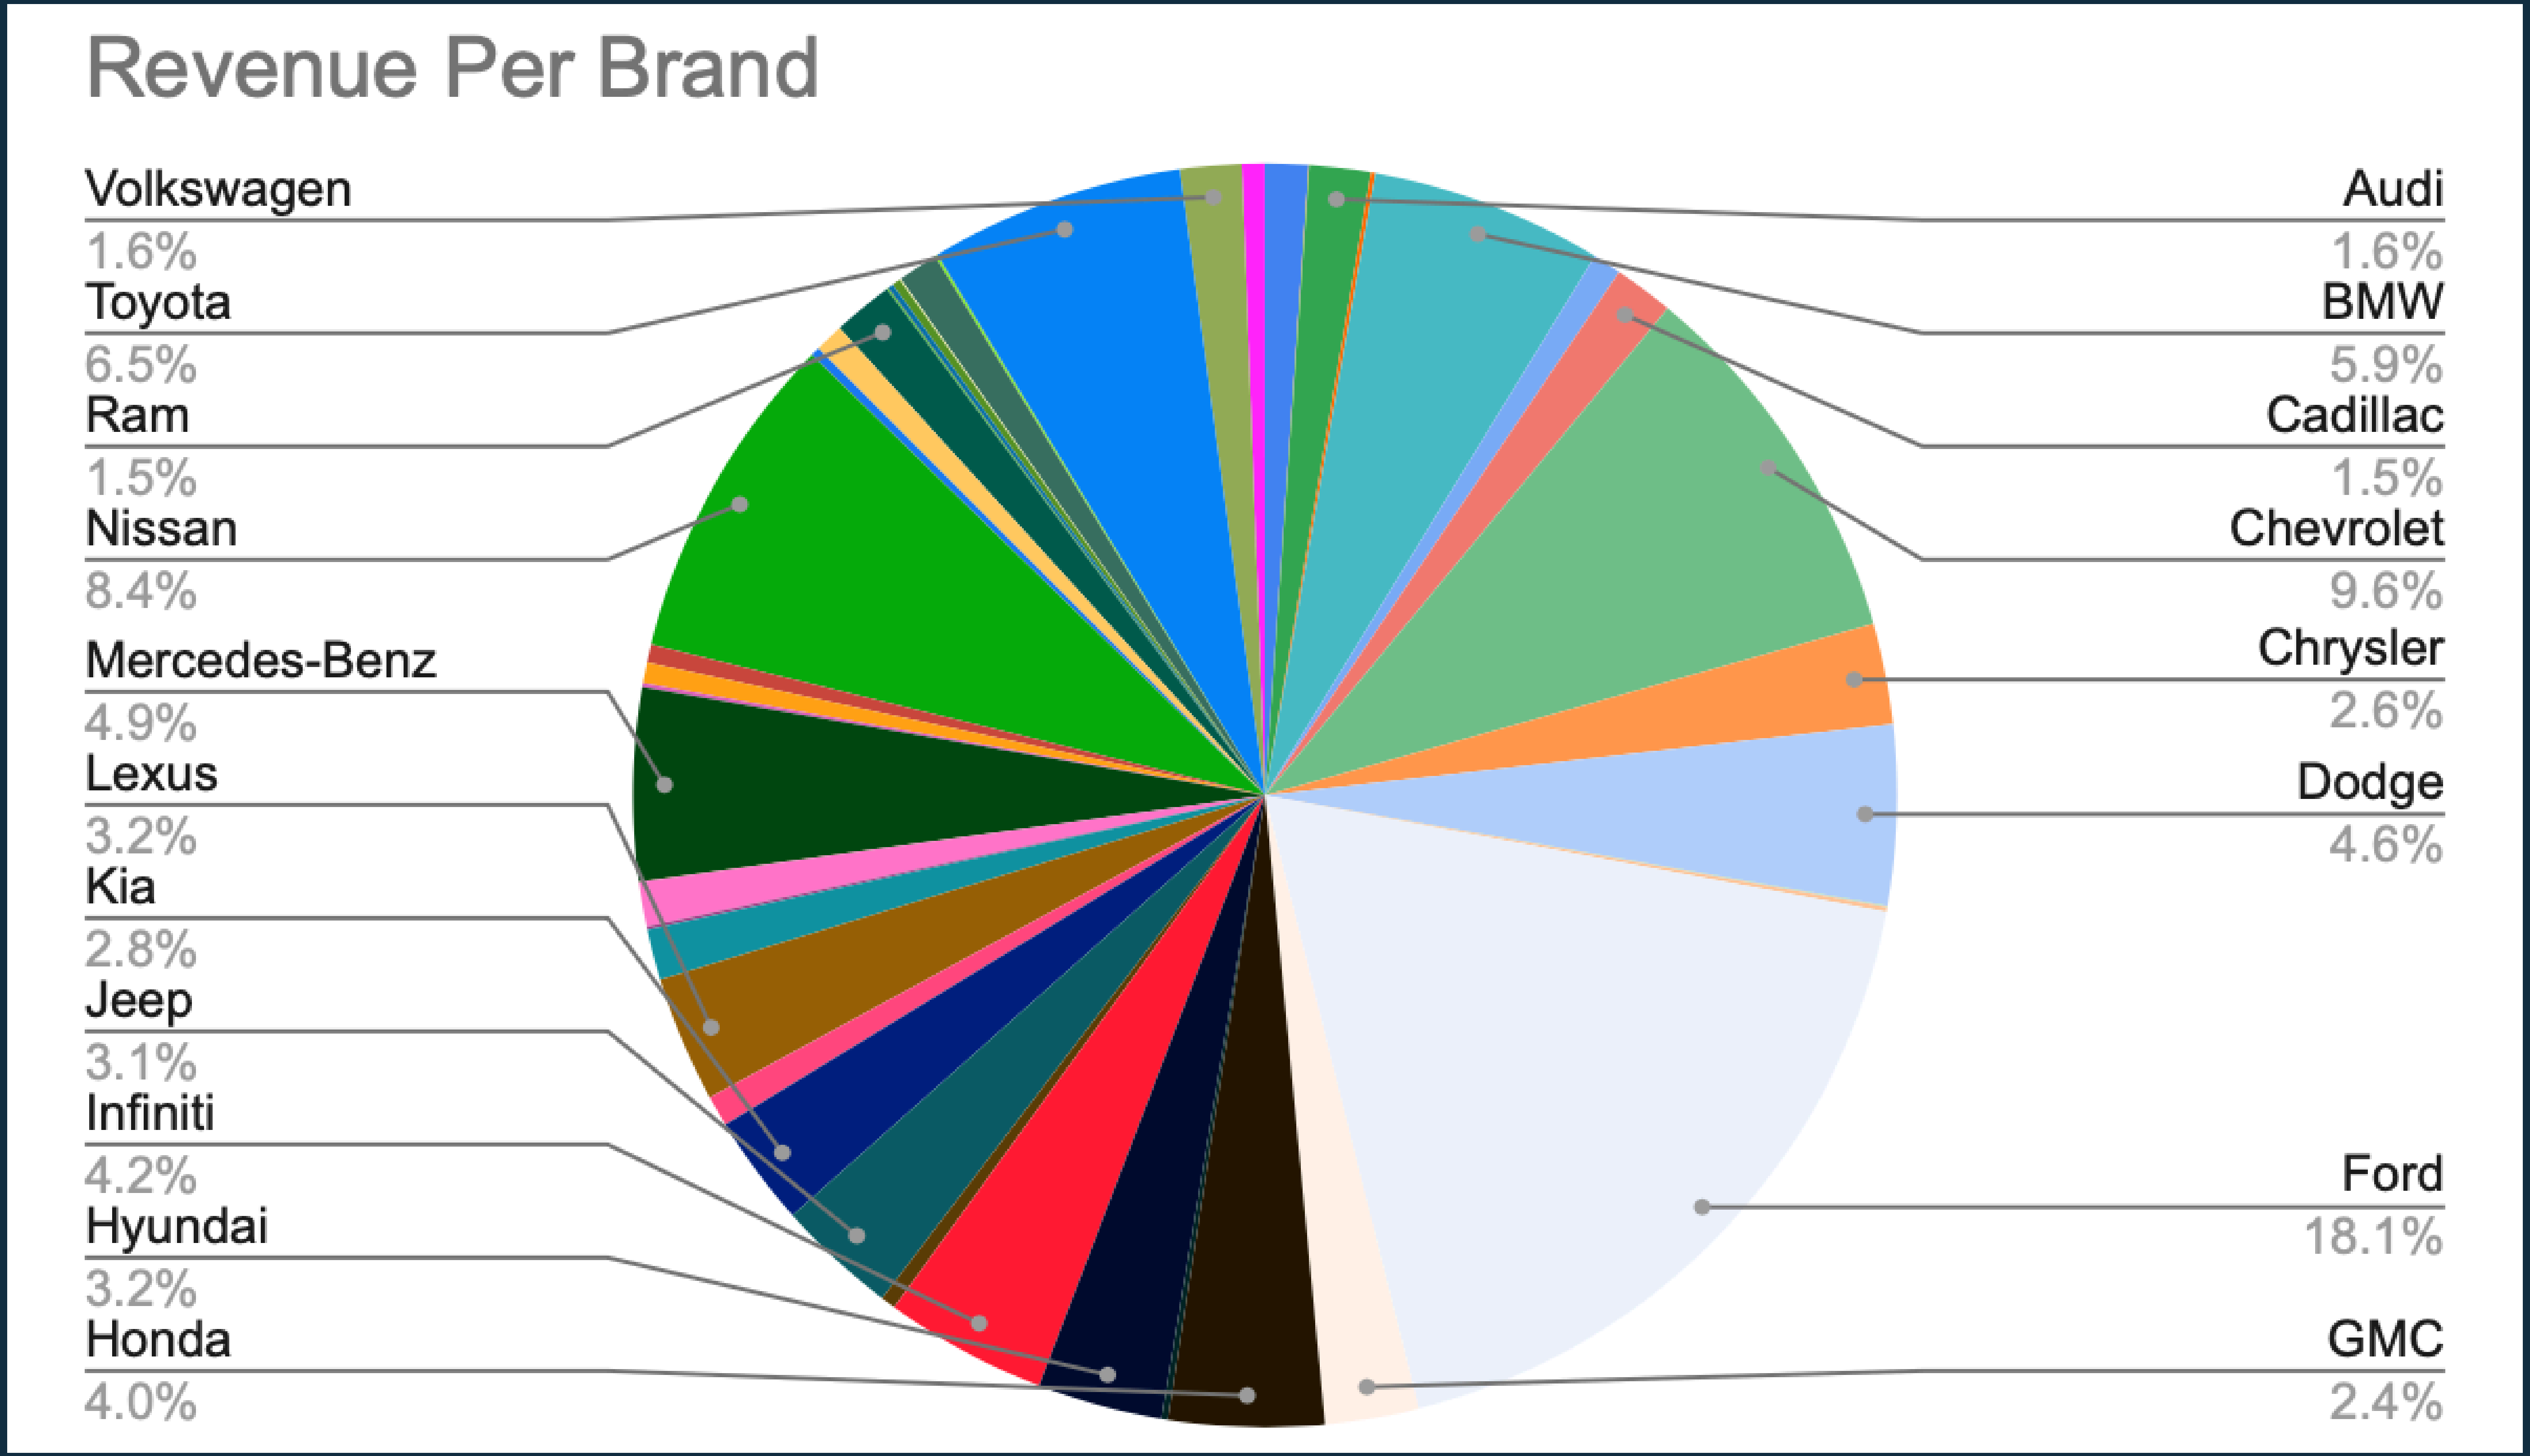
Tracking effectiveness of sales efforts is essential.

Customer Acquisition Cost

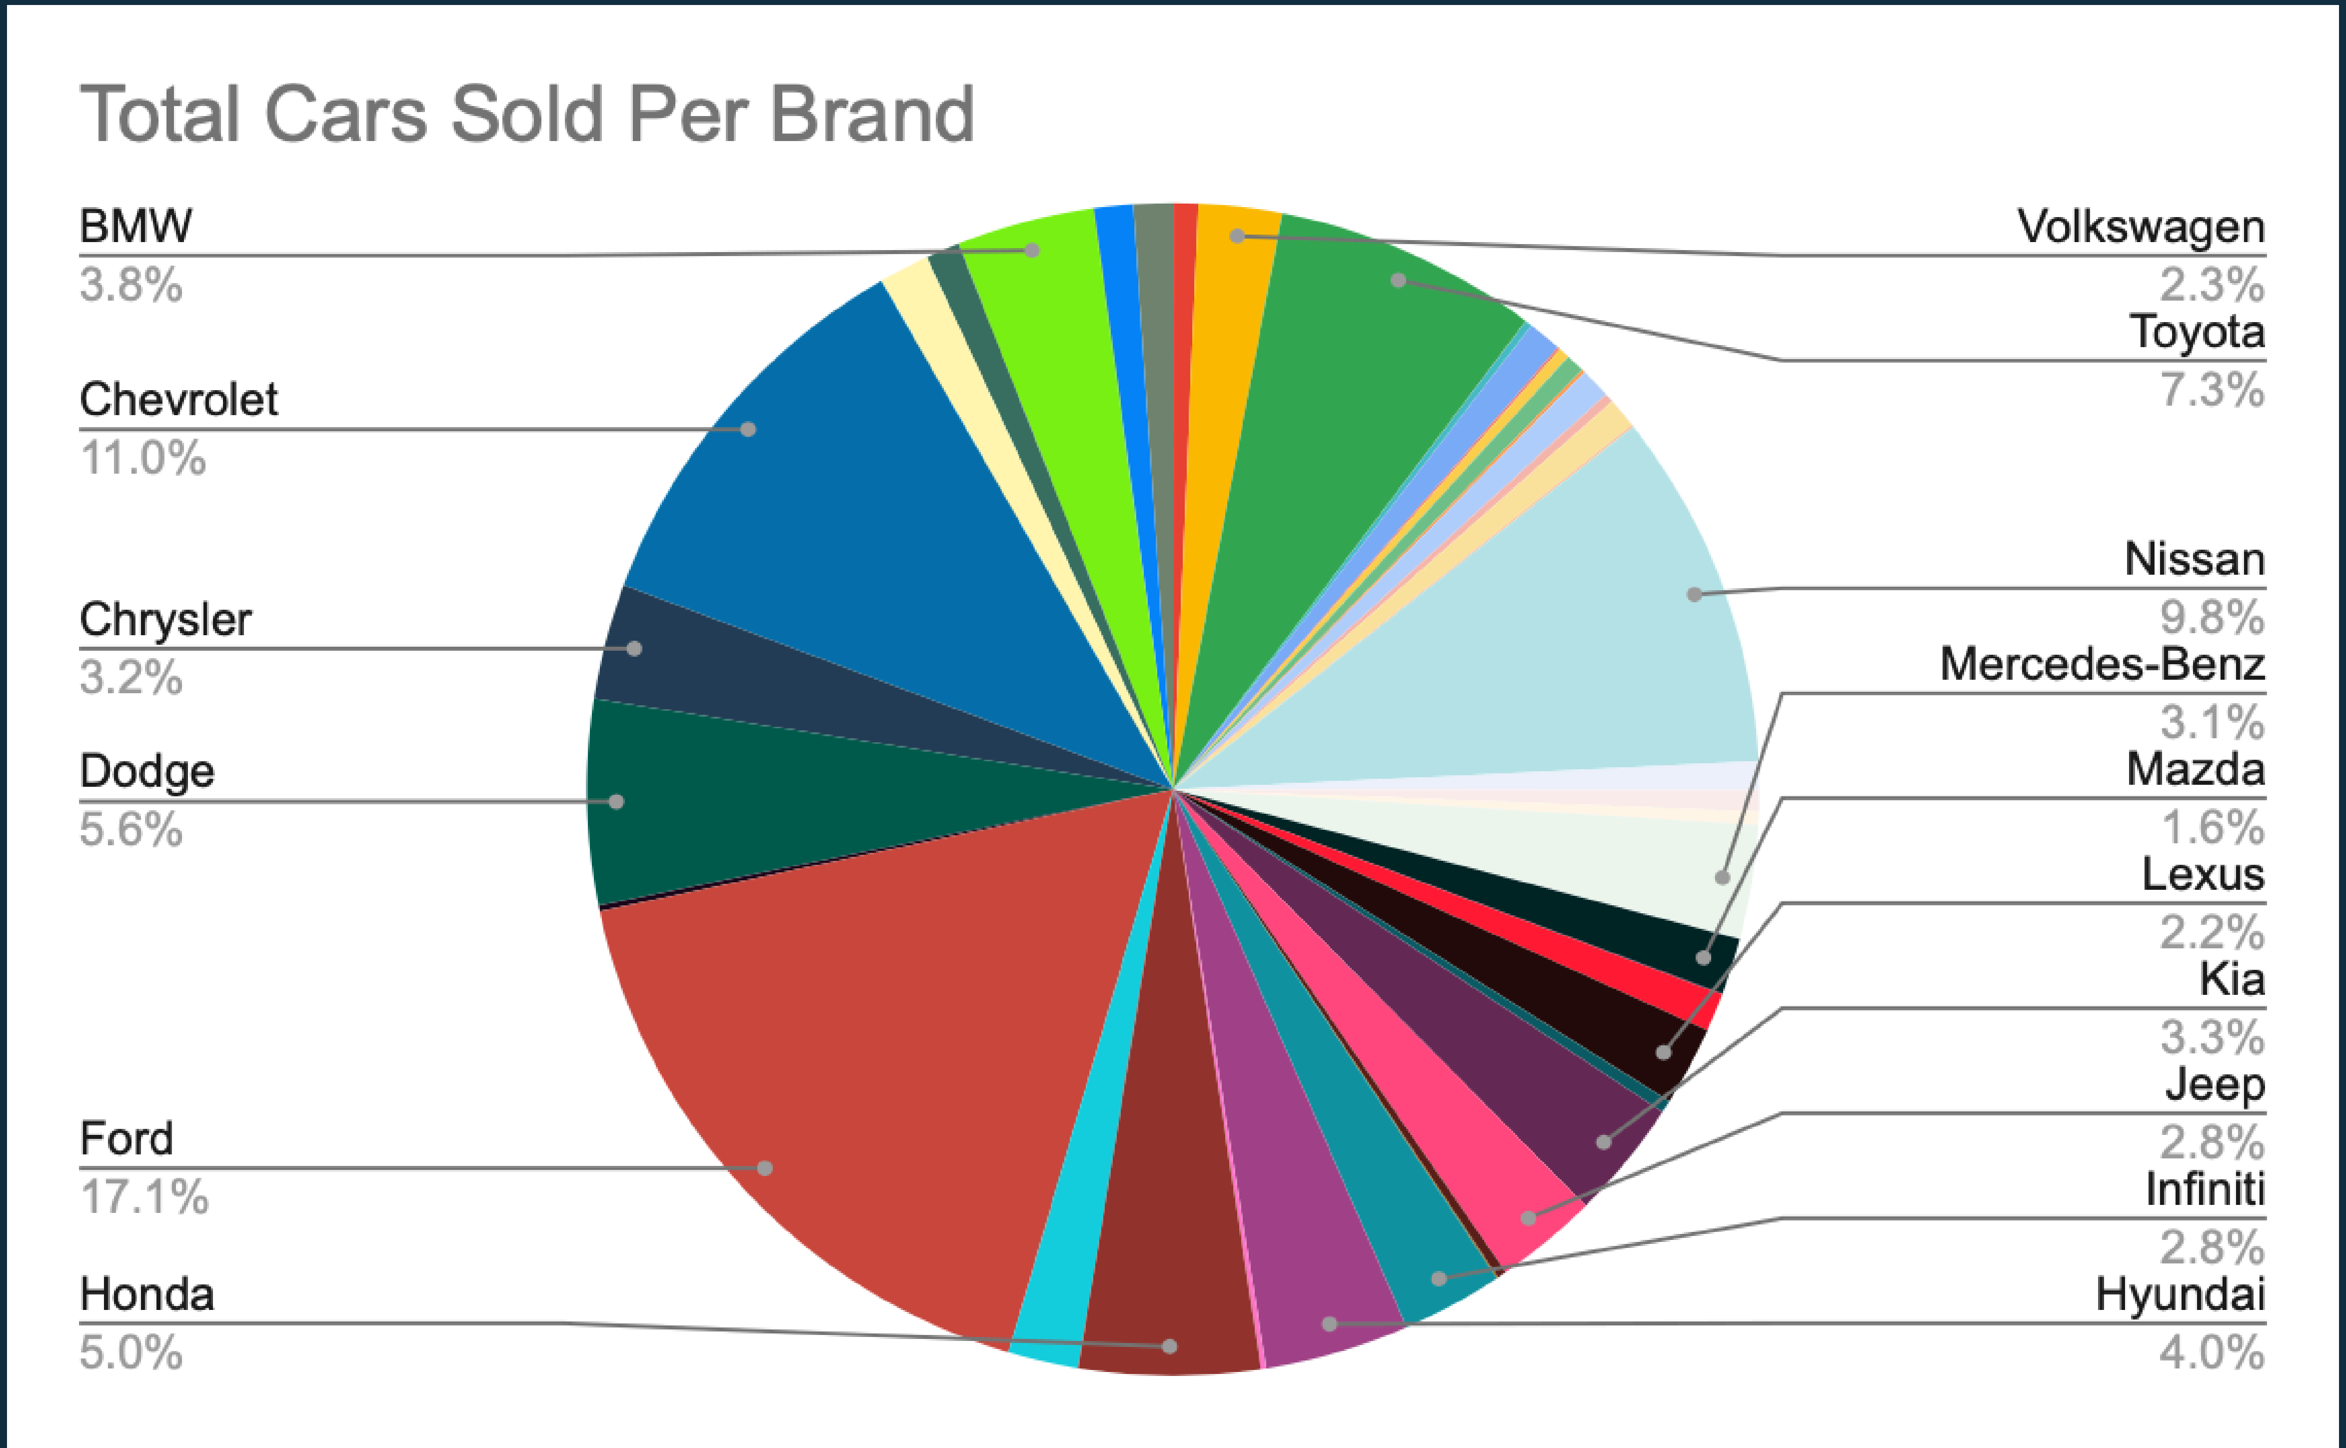
Understanding expenses involved in gaining new customers.

Average Transaction Value

Evaluating revenue generated per sale is crucial.

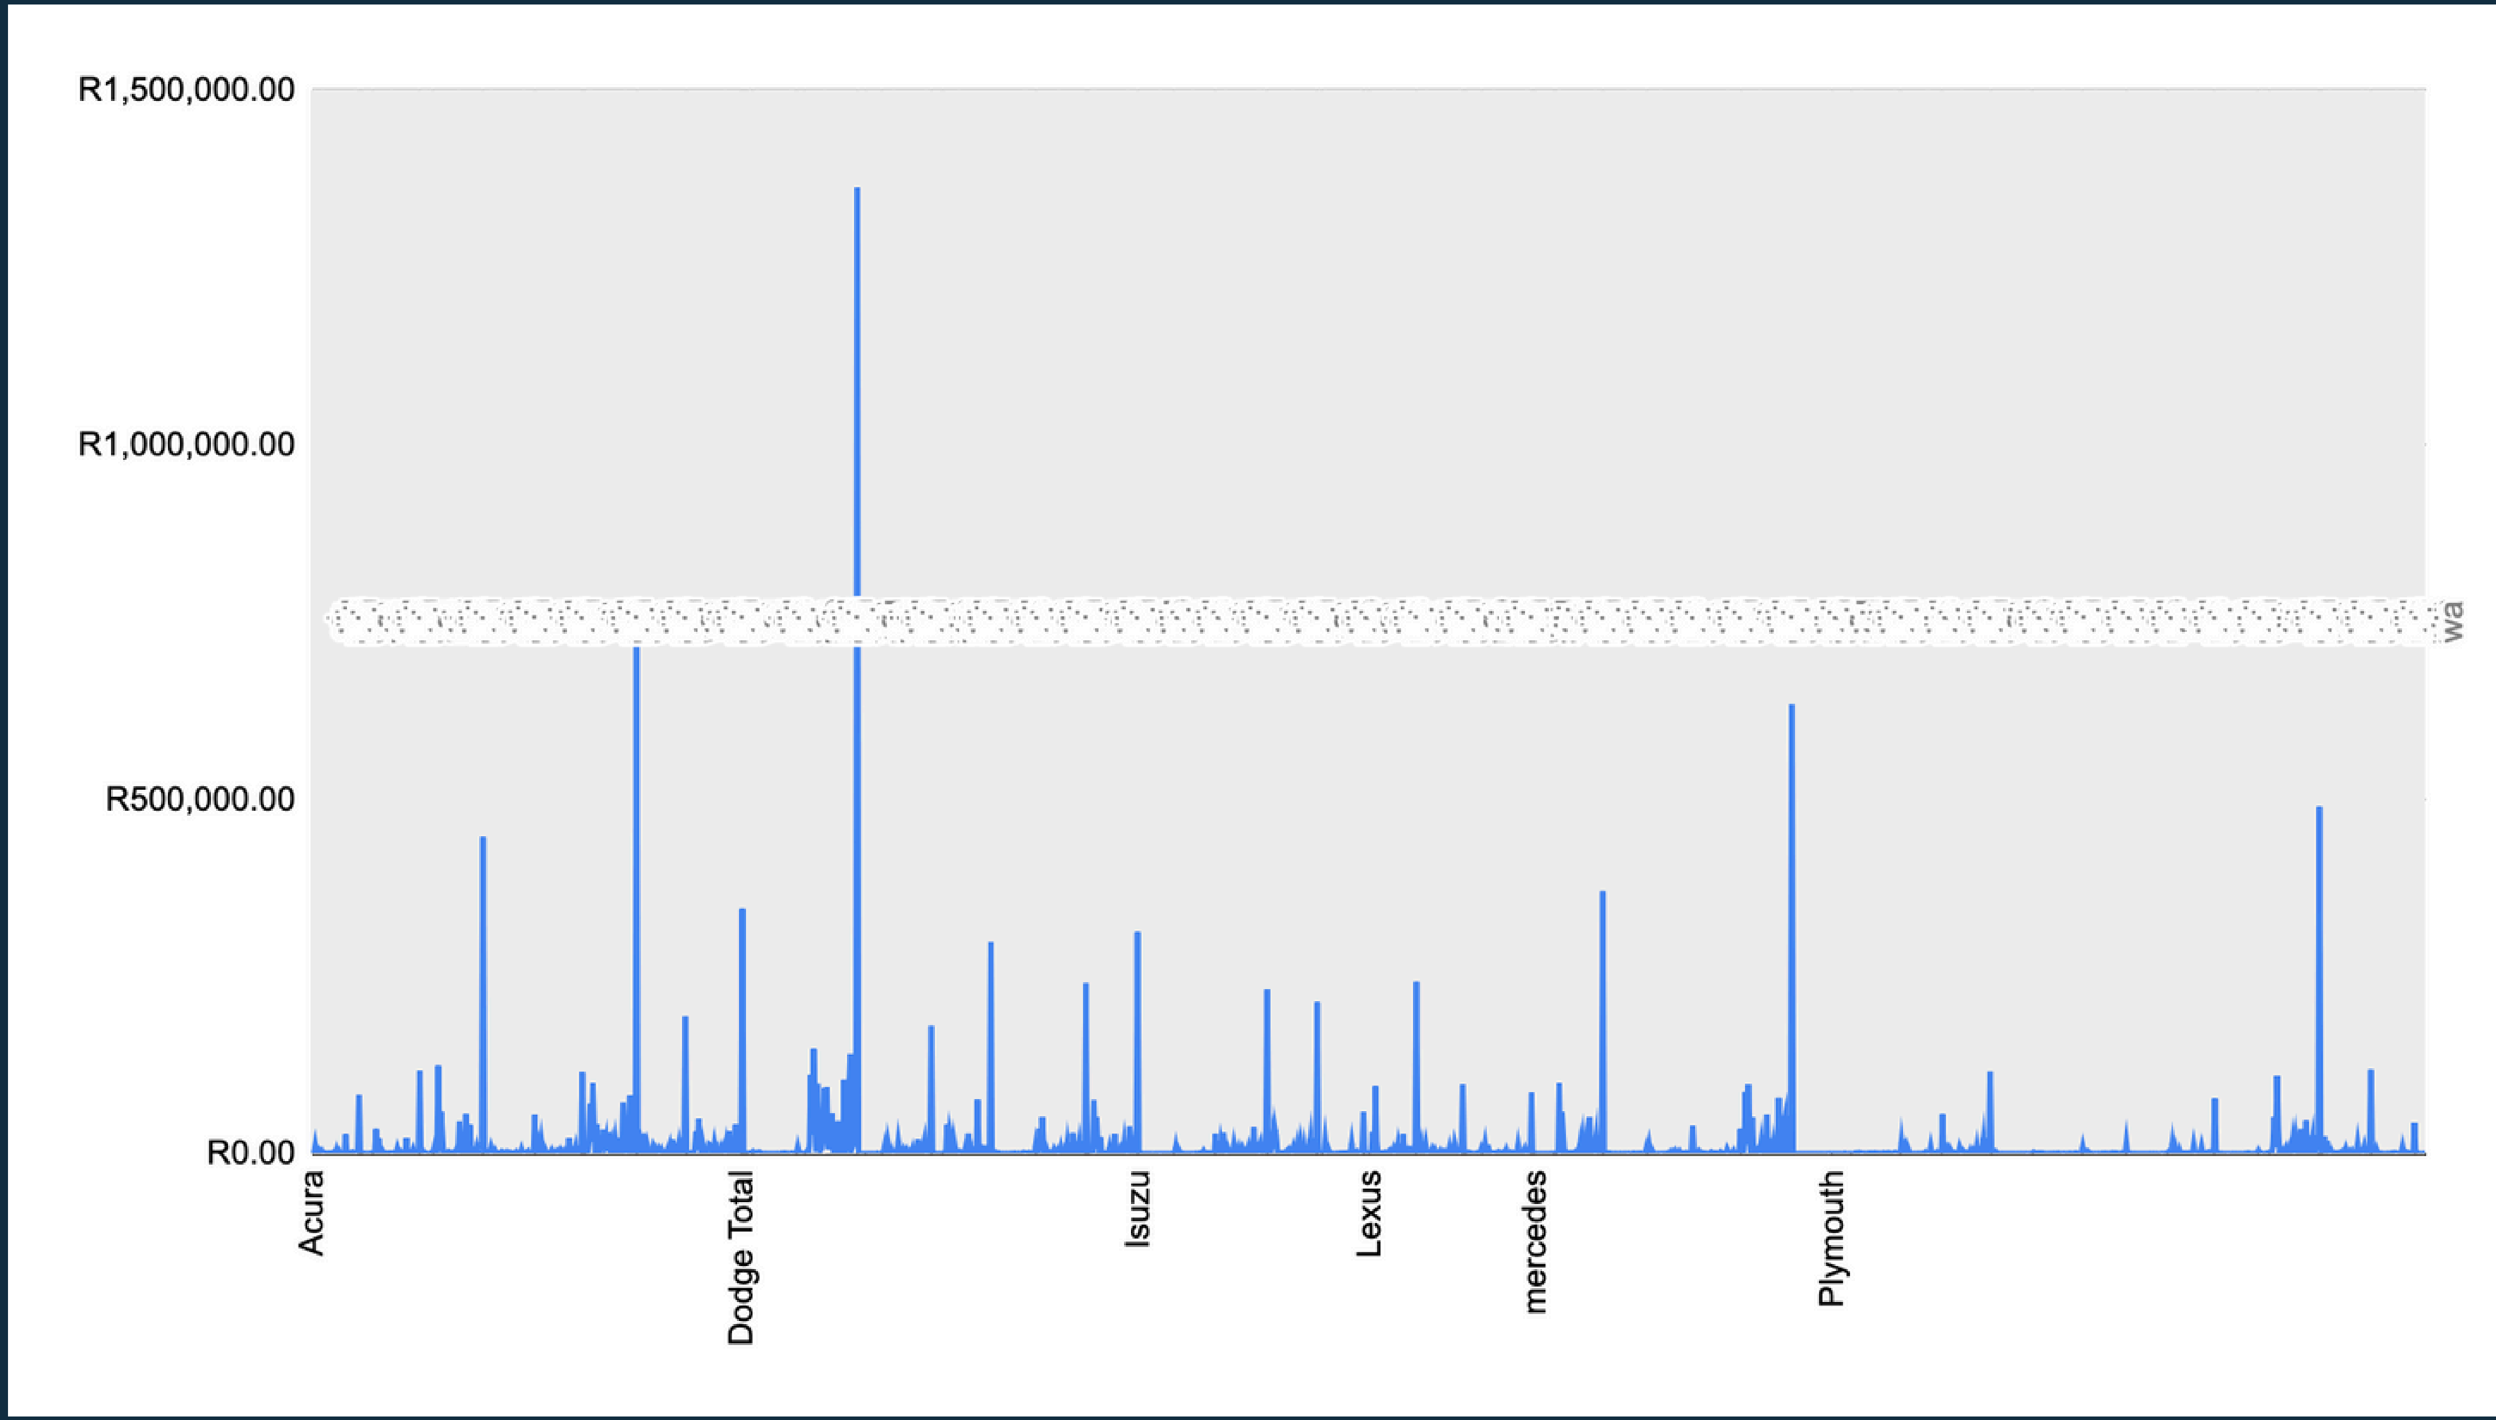


Ford is your strongest performer by far — its revenue is nearly double Chevrolet.
Chevy + Ford together make up over 2 billion in revenue, indicating strong demand for domestic brands.
German luxury (BMW, Mercedes-Benz) performs extremely well, showing buyers are willing to pay premium prices.
Japanese reliability brands (Toyota, Honda, Lexus, Nissan) also consistently deliver strong revenue, likely due to high sales volumes.



Ford is the undisputed sales leader
Ford: 93,997 units sold
Nearly double the next competitor (Nissan with 54,017).
Suggests:
Strong brand trust
High turnover of SUVs, trucks, and sedans
Major profit driver for any dealership
Nissan – 54,017
Strong demand, especially Sentra, Altima, Rogue.
Chevrolet – 60,587
High turnover, value-for-money buyers.
Toyota – 39,966
Known for reliability; customers actively prefer it.
Honda – 27,351
Balanced demand for sedans and compact SUVs.
Hyundai – 21,836
Increasing market share due to affordability.
Kia – 18,084
Strong alternative to Toyota/Honda.

Revenue Per Brand in region



High-volume states:
Texas — Trucks/SUVs dominate
California — High sales across all categories
Florida — High used-car market turnover
New York/New Jersey — Strong sedan & luxury demand

Where the revenue is growing: • Shift to SUVs, trucks, and crossovers • Ford, Chevrolet, Nissan, Toyota, and Jeep sit at the top with SUV/truck-heavy lineups • Luxury momentum from BMW, Mercedes-Benz, Lexus shows demand for comfort, brand image, and fresh tech • Premium SUVs like BMW X and Lexus RX are hot

Recommendations

Experience

Focus on personalization and feedback
Shift inventory toward SUVs + Trucks
Fuel-efficient

Training

Invest in ongoing education programs
Cars with cleaned interiors, serviced engines, and minor paint fixes sell 12–18% faster.

Marketing

Utilize online channels effectively
Market MMR
Buyers prefer reliable & affordable brands
Target value-seeking customers with Hyundai, Kia, Nissan promotions
They have strong volume and fast turnover.

Pricing

Implement competitive pricing models
Increase inventory of high-volume, high-turnover brands
Ford, Nissan, Chevrolet, Toyota, Honda
Allocate more lot space to SUVs & trucks
They have stronger demand and better resale value.
Clean & standardise your data
Fix brand duplicates before analysis.
Promote financing and certified pre-owned programs
Especially for luxury brands (BMW, Mercedes).
Target value-seeking customers with Hyundai, Kia, Nissan promotions
They have strong volume and fast turnover.
